Notice to Users

The Department's new Transportation Information System (TIS) has changed the way Montana roads are identified. A unique "base route" concept uses an identifier, number, and roadbed to define each road. Work on this system is still in progress.

In order not to delay the production of the 1999 County Map Book by incorporating the "base route" numbering system, the Department is releasing this interim publication showing all the current public roads throughout Montana. The state's major routes (approved by the Transportation Commission) are shown on the county maps as follows:

- National Highway System routes are shown with a "NHS" after the route number (note: the Interstate System is all on the NHS)
- State Primary System routes are shown as "P- # #"
- State Secondary System routes are shown as "S- # # #"
- State Urban System routes are shown as "U- # # # #" or as "URBAN"

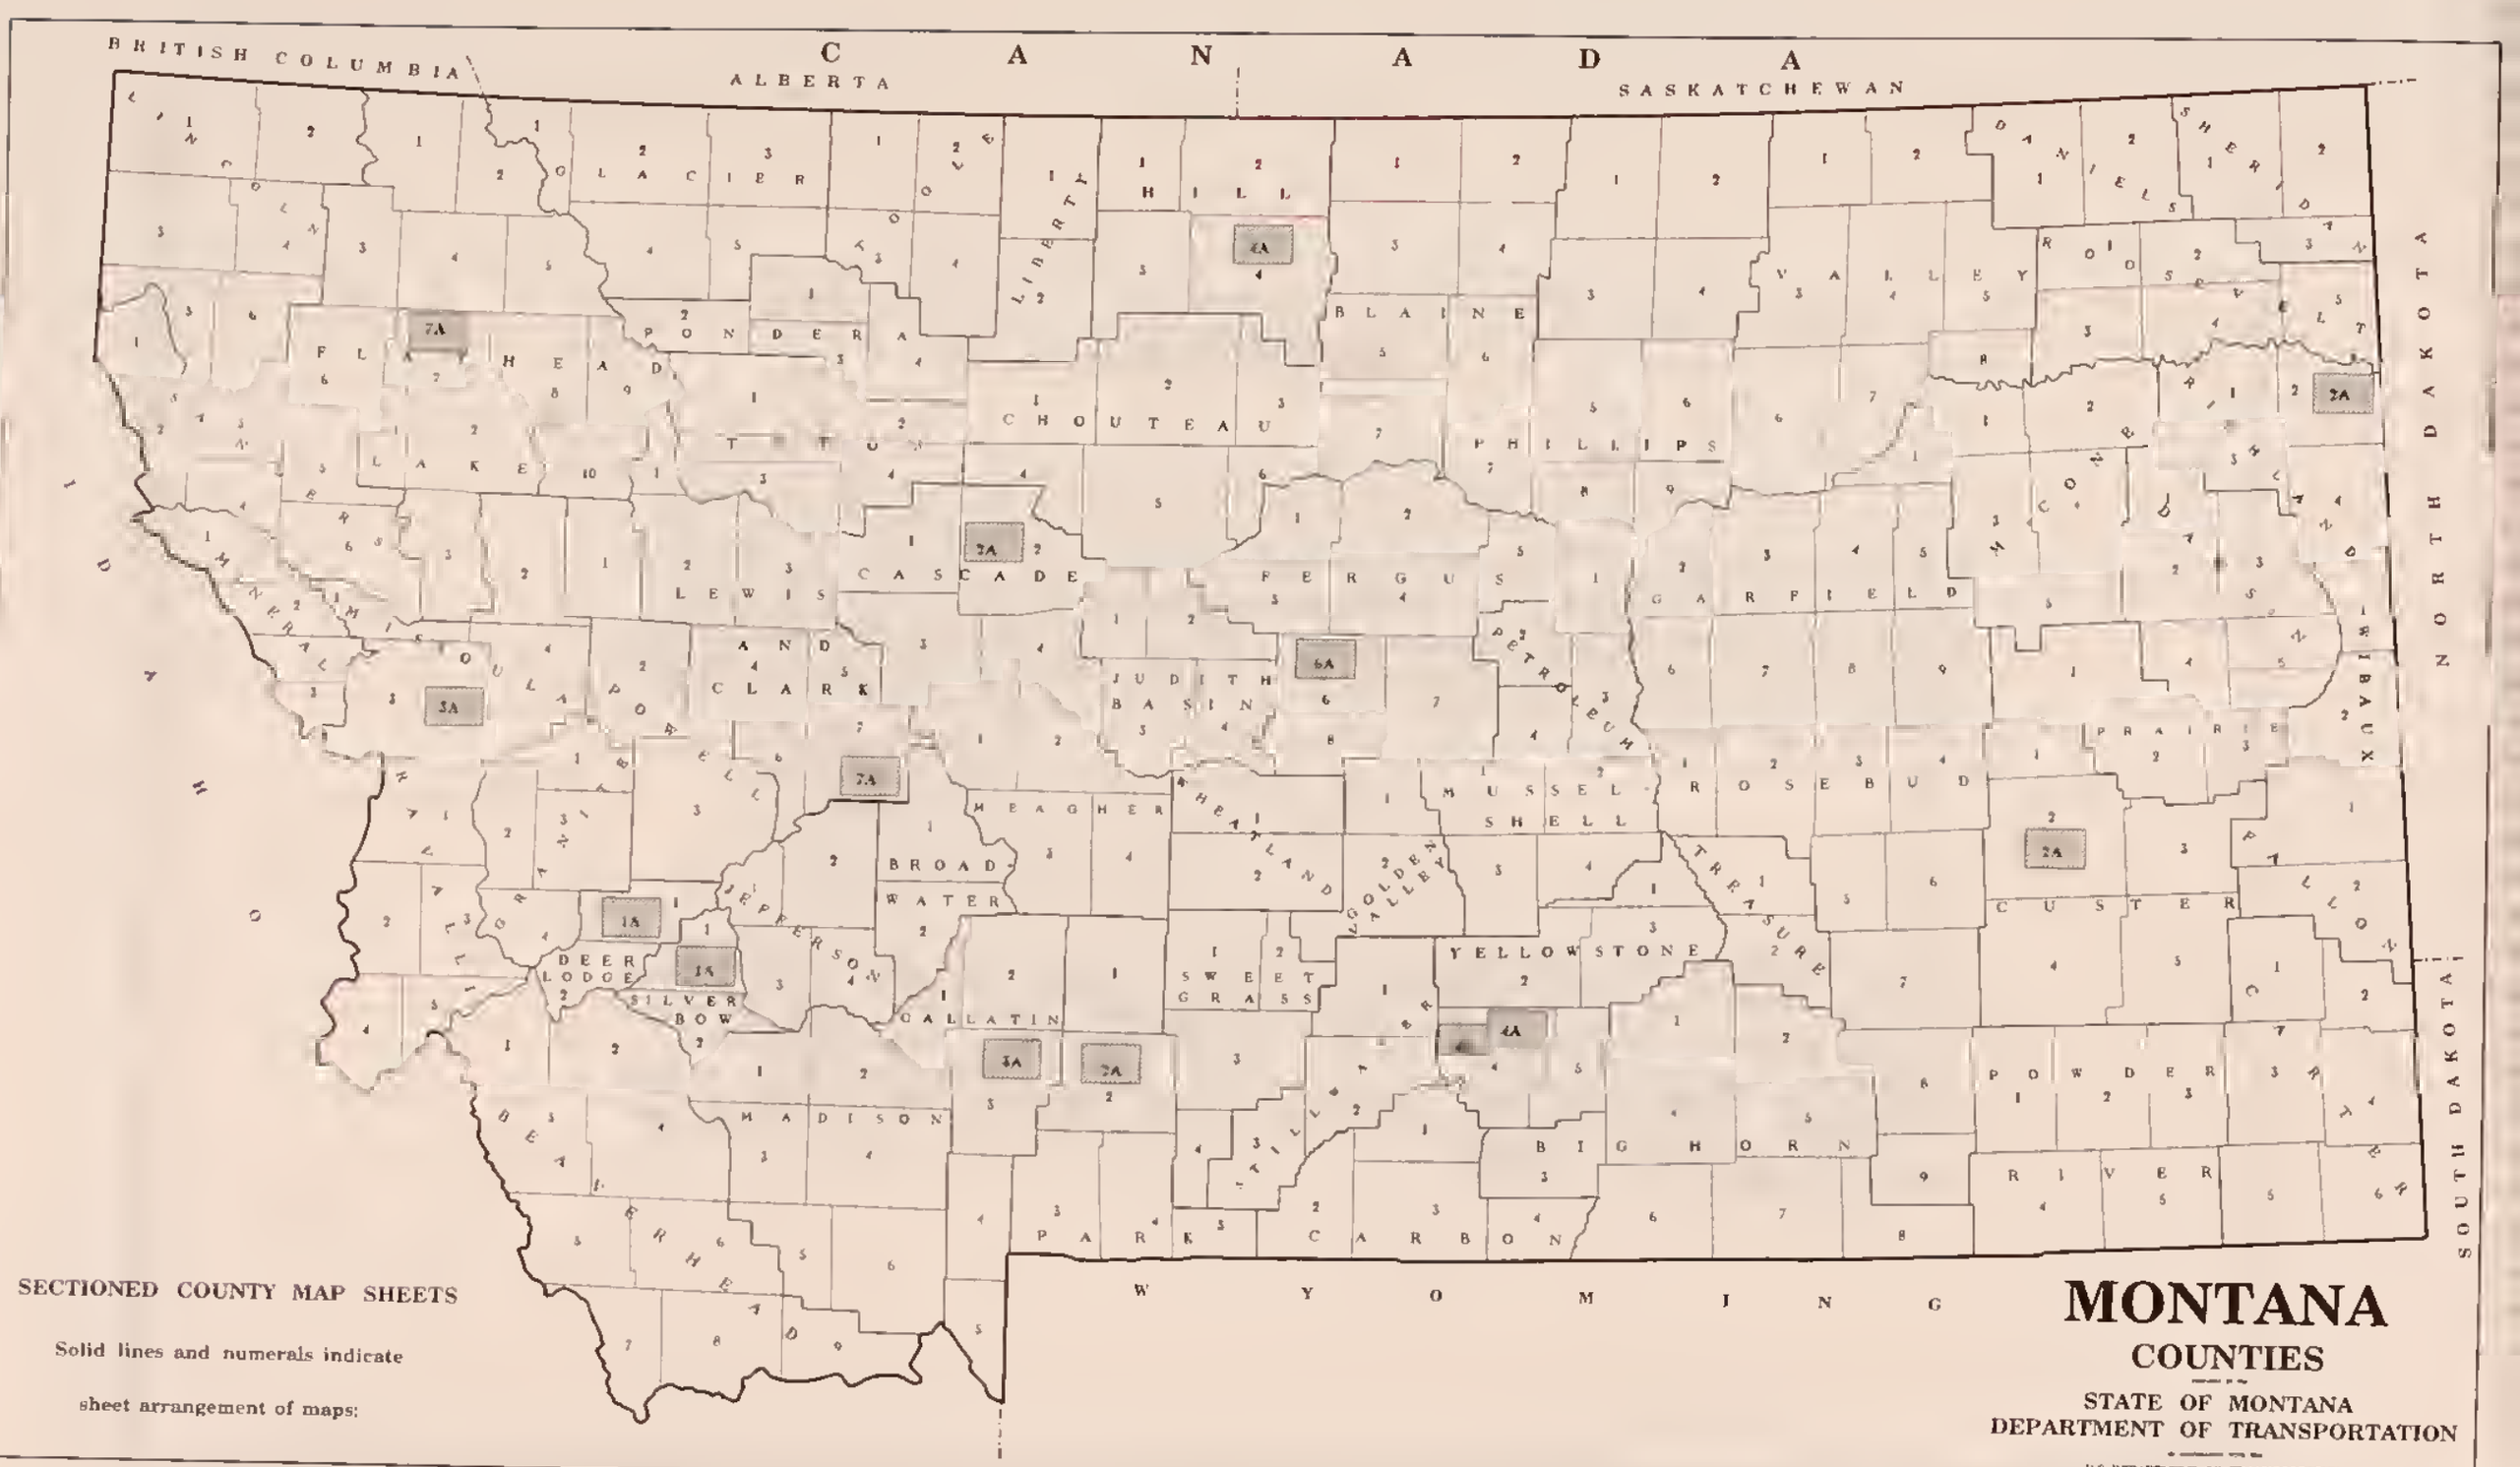
Routes affected by recent urban boundary extensions in Billings, Bozeman, and Butte are included in this publication. Other System actions affecting routes in Helena, Lewistown, Miles City, and McCone County are also shown.

If you have any questions regarding information contained in this publication, please call (406) 444-6111.

PREFACE

Montana County Maps Book is a publication containing 17" X 11" map sheets of the entire state. The maps are printed back to back in black and white. There are a total of 276 county maps that also include Montana's 14 urban areas. These maps are revised on a continual basis to reflect current status in road alignment, surface type, bridges and system changes.

These planimetric general highway county maps show public roads on a land grid of township, range, and section lines. Cultural features adjacent to roads are displayed by symbols. Surface types are shown for all roads. The maps also indicate cities, towns, national forests, federal reservations, game refuges, lakes, reservoirs, streams, railroads and mountain peaks with elevations. Drainage and alignment of roads are checked with aerial photographs when needed.



SECTIONED COUNTY MAP SHEETS
